
lazo externo
(lineal)
$y_d^{(r)}$
lazo interno (no lineal): de v a y queda $1/s^r$
$\bar{y}_d$
e
K
$v - a$
$\frac{1}{b(z)}$
u
$\dot{x} = f(x) + g(x)u$
$y = h(x)$
y
x
$a(z)$
z
$z = \Phi(x) = (\xi, \eta)$
$\xi = (y, \dot{y}, \ldots, y^{(r-1)})$
